# **Project Green Light**

Sponsored by:  
Environmental and Conservation  
Organization

## **Energy Conservation in Your Home**

PROJECT GREEN LIGHT is a grassroots effort to get congregations of faith and community organizations involved in taking responsibility for their energy usage through a friendly, community-wide competition.

***A GOOD THING TO DO,  
THE RIGHT TIME TO DO IT!***

## CALL TO ACTION

The consequences of energy consumption are becoming increasingly apparent in our lives. Rising gasoline and utility costs affect us squarely in our pocketbook. The public is increasingly aware that the consequences extend to:

- Air pollution
- Power plant water consumption
- Respiratory diseases
- Loss of habitats
- Climate change

This awareness is taking place in a big way at churches around the nation who are increasingly connecting their spiritual and religious values with action focused on greater stewardship of the earth. Concerned citizens participate in a range of other organizations. These concerns requires making responsible decisions that educate, mobilize and activate people to make a difference.

**Project Green Light** is sponsored by the Environmental and Conservation Organization (ECO) to get members of congregations and community organizations involved in taking responsibility for their energy usage in their own homes.

## HOW PROJECT GREEN LIGHT WORKS

**Work Together** – A congregation or organization forms a group interested in reducing their energy consumption.

**Set Your Energy Savings Goal** – Members make a pledge to cut their energy costs by at least 15% over the course of a year.

**Identify What To Do** – Every member determines how to reduce the energy consumption in their own homes. Sign up for a minimum of three steps you will take.

**Make the Changes** – With the support of friends, ECO Green Light Support Team and professionals, make your lifestyle more sustainable and your home more efficient.

**See the Results** – Track your energy usage and enter it on-line or with your group. Each church/organization will also have an “Earth Steward” who will motivate their participating members and help them stay on track.

**Celebrate Success** – ECO will sponsor community recognition of major achievements and group savings.

## WORKING TOGETHER MAKING IT HAPPEN

**Project Green Light members will get help with:**

- Energy audits of their home
- Selecting a personal list of energy saving actions
- Energy saving tips
- Do it yourself help sheets
- Workshops focused on specific energy saving methods
- Where to go for help
- Discounts from local companies

***You do your part toward helping the group achieve its overall, combined-savings goal.***

### **Saving Energy in Your Home**

- **Cut fossil fuel consumption**
- **Reduce power bills**
- **Stimulate local economy**

### **Make it fun**

### **Make a difference**
